

# Born Learners School

## PROGRAM CONTENT - PRE-SCHOOL

### PEABODY EARLY EXPERIENCE KIT - LANGUAGE:

This program is designed for children 2 to 4 YRS. The program focuses on the following development areas:

- Affective: Awareness of self, social interaction, awareness of others.
- Cognitive: Concepts of shape, size, color, memory, numbers, creativity, problem solving.
- Linguistic: Vocabulary development, questioning skills, verbal expression.

All these skills are taught through the central character puppet, Mr. Pazoo. He is used to teach the new concepts, to stimulate the children to solve problems, to tell stories and to lead the children in the learning games.

### ALPHA TIME - READING READINESS:

This program is a multi-media, multi-sensory beginning reading program. It allows the child to develop his pre-requisite reading skills through active participation, visual delight and fantasy. Each alphabet letter is introduced as a "Huggable Letter Person." The program includes a variety of experience in visual, oral and auditory discrimination, comprehension, sequencing, listening, following directions, music and rhythm.

### WORD RECOGNITION/WRITING:

Children receive practice in recognizing their names and tracing the letters of the alphabet.

### INDEPENDENT CENTERS:

The areas of art, craft, science, music, themes, and creative play are introduced to the students during learning centers. The students may exercise their independence in choosing centers, as well as experiencing the teacher-directed centers. Children in these early stages of development learn and grow by doing - centers provide them with the opportunity, i.e., painting, clay, dress-up, blocks, drawing, water play, dance, singing, building, musical instruments.

### PROGRAM CONTENT - ALL STUDENTS:

Born Learners offers a well-balanced, comprehensive curriculum for all students. Please click on the link [PROGRAM CONTENT - ALL STUDENTS](#) to view the additional features included in each of our programs.
